General Information

Long Name

Cheese, White Cheddar, Organic

Description (General/Physical/Manufacturing Information)

Glanbia organic white Cheddar cheese is produced from organic pasteurized milk. It has a firm body, closed texture and a clean odor and flavor. Glanbia organic white Cheddar meets the requirements stated in 21 CFR Sec. 133.113 and is certified as organic in accordance with the provisions of Title 22, Chapter 11, Idaho Code, Organic Food Products, IDAPA 02.06.33, Organic Food Product Rules and 7 CFR Part 205 National Organic Program.

Composition

Global Food Allergens.

Allergen	Definition	Does Contain	Does Not Contain	Cross Contact	Source of Allergen
Crustacean	and crustacean products (e.g.shrimp, lobster)		☑		
Egg	and egg products from hens and other avian species		☑		
Fish	and fish products excluding fish gelatin		☑		
Lupin	and lupin products		☑		
Milk	and milk products from all mammals	☑			Bovine
Mollusk	and mollusk products (e.g. oyster, clam)		☑		
Peanut	excluding highly refined oil		☑		
Seeds, Sesame	excluding highly refined oil		☑		
Soya	excluding lecithin,highly refined oil and tocopherols		☑		
Tree Nuts,Almond	excluding highly refined oil		☑		
Tree Nuts,Brazil	excluding highly refined oil		☑		
Tree Nuts,Cashew	excluding highly refined oil		☑		
Tree Nuts,Hazelnut/ Filbert	excluding highly refined oil		☑		
Tree Nuts,Macadamia	excluding highly refined oil		☑		
Tree Nuts,Pecan	excluding highly refined oil		☑		
Tree Nuts,Pine	excluding highly refined oil		☑		
Tree Nuts,Pistachio	excluding highly refined oil		☑		
Tree Nuts,Walnut	excluding highly refined oil		☑		
Wheat	and wheat products excludingHACCP Standard exemptions		☑		

Regional Food Allergens.

Salmonella (KNA Requirement)	/2 x 375g	PCR Acceptable	Each Lot
Yeast	/g		

Microbiological Requirements

Microbiological Definitions

When values are given for n and c the standards are based on the ICMSF system with definitions of:

I/C-SU: Individual/Composite-Sample Unit Quantity

n: Number of sample units chosen separately and independently.

Cheese,White Cheddar,Organic

Part [Rev]: 10227586 [3]
Specification Type: RMAT
Status: APPROVED
Last Modified On: 2/23/2015 12:42:03 PM

c: Maximum allowable number of results between m and M.

m: Level of the test organism which is acceptable and attainable in food. It separates good quality from marginally acceptable quality; up to and including M.

M: The upper acceptable concentration of a test organism. A count above M for any sample unit is unacceptable.

For test properties Enterobacteriaceae and Coliform – only one test is necessary as per regional requirement, not both.

Where indicated, the “KNA Requirement” sample size should be used for product shipped to or manufactured in the US, Canada and Mexico (e.g. Salmonella sample size, Nut sample size).

A zero (0) in the m or M column refers to the lower limit of detection for the method employed (e.g. E. coli: negative, <3 or <10).

Legal Requirements

All microbiological limits must comply with the current relevant local legal requirements if those limits are more stringent than Kraft Foods requirements.
Microbiological test methods other than those listed in the agreed upon specification may not be used for analysis without the prior written approval
of the Kraft Foods Corporate Microbiology function
