# A994

## Product Information

Version: 10 PI EU EN 04-23-2020

## Description

This Chr. Hansen EASY-SET® culture contains defined mesophilic and thermophilic strains and is for continuous direct vat set use. The strains are carefully selected to provide fast lactic acid production and extreme phage robustness without any $CO_2$ production (homofermentative). The EASY-SET® A1000 program provides an unparallelled performance consistency between culture rotations.

Culture composition:
Lactococcus lactis subsp. cremoris
Lactococcus lactis subsp. lactis
Streptococcus thermophilus

| | | | |
|---|---|---|---|
| Material No: | 713115 | Color: | Off-white to slightly reddish or brown |
| Size | 6X1000 U | Format: | F-ES |
| Type | Bag(s) in box | Form: | Frozen pellets |

## Storage and handling

< -45 °C / < -49 °F

## Shelf life

At least 12 months from date of manufacture when stored according to recommendations.

## Application

Usage
The culture is primarily applied in the production of Cheddar, Colby and Monterey Jack cheese.

Recommended inoculation rate

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Amount of milk to be inoculated (in liters) | 5,000 | 7,500 | 10,000 | 15,000 | 20,000 | 25,000 | 30,000 |
| Amount of DVS culture | 500 U | 750U | 1,000 U | 1,500 U | 2,000 U | 2,500 U | 3,000 U |
| | | | | | | | |
| Amount of milk to be inoculated (in lbs) | 11,500 | 17,000 | 22,700 | 34,000 | 45,500 | 57,000 | 68,000 |
| Amount of DVS culture | 500 U | 750U | 1,000 U | 1,500 U | 2,000 U | 2,500 U | 3,000 U |

Designed for optimal performance, the composition and recommended inoculation rate for this culture were carefully developed by use of unique microbial strains, advanced biotechnological principles and more than 140 years of accumulated experience from the dairy industry.

Warning: Applying lower than recommended inoculation rate may cause undesired variation in product quality, lower production efficiency, product yield losses, potential fermentation failures and an increased risk of bacteriophage attacks.

Directions for Use
Remove cultures from the freezer just prior to use. Do not thaw. Disinfect the package prior to opening. Open the package and pour the frozen pellets directly into the pasteurized product. Agitate the mixture slowly for 10-15 minutes to distribute the culture evenly. For more information on specific applications please refer to our technical brochures and suggested recipes.

## Range
This series contains different culture alternatives allowing the user to rotate the cultures for good phage protection.

## Technical Data

Acidification curve

Fermentation conditions:
Whole milk 3.5 % fat (72°C/162°F, 15 seconds)
Inoculation: 1000U/10000L.

Other Information
Salt sensitivity:
- 50% inhibition: 4.0% NaCl.
- 100% inhibition: >6.0% NaCl.

Analytical Methods
References and analytical methods are available upon request.

Chr. Hansen's cultures comply with the general requirements on food safety laid down in Regulation 178/2002/EC. Lactic acid bacteria are generally recognized as safe and can be used in food, however, for specific applications we recommend to consult national legislation.

The product is intended for use in food.

## Food Safety

No guarantee of food safety is implied or inferred should this product be used in applications other than those stated in the Usage section. Should you wish to use this product in another application, please contact your Chr. Hansen representative for assistance.

## Labeling

Suggested labeling "lactic acid culture" or "starter culture", however, as legislation may vary, please consult national legislation.

## Trademarks

Product names, names of concepts, logos, brands and other trademarks referred to in this document, whether or not appearing in large print, bold or with the ® or TM symbol are the property of Chr. Hansen A/S or an affiliate thereof or used under license. Trademarks appearing in this document may not be registered in your country, even if they are marked with an ®.

## Technical support

Chr. Hansen's Application and Product Development Laboratories and personnel are available if you need further information.

GMO Information
In accordance with the below mentioned legislation of the European Union we can inform that:

A994 is not a GM (genetically modified) food *.
It does not contain or consist of GMOs and is not produced from GMOs in accordance with Regulation 1829/2003* on GM food and feed.
As such GM labelling is not required for A994 or the food it is used to produce**. Moreover, the product does not contain any GM labelled raw materials.

** Regulation (EC) No 1829/2003 of the European Parliament and of the Council of 22 September 2003 on genetically modified food and feed.*
*** Regulation (EC) No 1830/2003 of the European Parliament and of the Council of 22 September 2003 concerning the traceability and labelling of genetically modified organisms and the traceability of food and feed products produced from genetically modified organisms and amending Directive 2001/18/EC.*

*Please note the information presented here does not imply that the product can either be used in, or is externally certified to be used in, food or feed labelled as 'organic' or 'GMO free'. Requirements to make these claims vary per country, please contact us for more information.*
