Beef, Pork, Chicken	NO	NO
Natural latex	NO	NO

[1] For country-specific labelling requirements refer to the relevant national regulations

[2] In the production of this food enzyme, wheat derived substances are used in the fermentation process as nutrient source for the growth of the production microorganism. During the fermentation process and following processing steps, the nutrients are consumed. To ensure that gluten proteins are no longer present in the food enzyme preparation, DSM conducts periodical analyses to verify the absence of gluten proteins. Appropriate analyses show that gluten proteins are not detectable (ELISA RIDASCREEN® Gliadin, LOQ: 5 mg/kg (as gliadin)
