BLOMMER CHOCOLATE COMPANY
ALLERGEN STATEMENT

COCOA POWDERS, NATURAL AND DUTCHED

Cocoa Powders manufactured at Blommer Chocolate Company are manufactured on dedicated equipment according to the Standard of Identity for - 21 CFR Part 163-Cacao Products. Cocoa is the food prepared by pulverizing the material remaining after part of the cacao fat has been removed from ground cacao nibs.

Cocoa may have approved alkali added during processing and will be labeled as Cocoa (processed with alkali).

Blommer Chocolate Company manufactures with milk and soy lecithin. Cocoa Powders are produced on dedicated equipment and not with milk and soy lecithin.
Blommer does not purchase eggs, fish, crustacean shellfish, wheat, mustard, sesame or sulfites.

Blommer Chocolate Company does not purchase peanuts/peanut derivatives or tree nuts for use on the same manufacturing equipment that is used to produce **COCOA POWDERS, BOTH NATURAL AND ALKALIZED.** Blommer Chocolate may have products in its Warehouse and Product Development area that may contain tree nuts, but those products are segregated and contained in a designated locked storage area pursuant to our written Allergen Program to prevent cross contamination.
