Blommer CHOCOLATE COMPANY East Greenville, PA.	Subject: COCOA POWDER PRODUCT PROFILE				
Effective Date:	**Original Date:**	**Originator:**	**Page**	**Revision Number**	**Document Number**
31-Aug-21	18-May-10	Quality Mgmt.	1 of 1	7	02.03.006

Product Name and Composition:
Cocoa powder (which may be processed with potassium carbonate, ammonium bicarbonate and/or Sodium hydroxide) is the very dry mass remaining after cocoa butter is removed from cocoa beans
Cocoa does not contain allergens. It is manufactured in a factory with milk and soy.

Origin of Ingredients:
Dominican Republic, Ecuador, Ghana, Ivory Coast, Mexico, New Guinea, Nigeria, United States of America, Peru, Malaysia, Haiti, Cameroon, Madagascar, Tanzania, Colombia, Venezuela, S. Korea, Germany, Thailand

Physical / Chemical /Biological Properties:
Water Activity (A_w): < 0.70 (standard for low-water activity food)
Salmonella spp.: Neg/750 g
pH: 5.1-8.0
Allergen Content: None (Manufactured in a factory with milk and soy)
%COCOA AND ALLOWABLE LEAD/CADMIUM (in PPM) >95%
(Per industry agreement, California Proposition 65)

% Cacao	Lead	Cadmium
Up to 65%	0.100	0.400
65% to 95%	0.150	0.450
> 95%	0.225	0.960

Treatment and Processing:
Cocoa kibble is mechanically ground into a fine powder.

Packaging System:
Multi-wall kraft paper bags made from FDA approved food-suitable materials at ambient temperature; supersacks made from FDA approved food-suitable materials at ambient temperature.

Labelling:
Per 21 CFR 163 Cacao Products part 163.113 Cocoa.

Storage and Distribution:
Store at 60 – 70°F and <60% relative humidity.
Distribution is via truck

Maximum Safe Shelf Life:
Typical shelf life published is based on time frames for optimal quality parameters (6 -24 months, product dependent). Cocoa (and its constituents – liquor, butter, kibble), chocolate, and coating products have no established threshold for a food safety-based shelf life when handled and stored in a sanitary manner.

Intended Customer Use and Consumer Target Groups:
Cocoa powder, though considered ready-to-eat, is an ingredient intended for internal use and further processing for the confectionery, baking, and dairy industry. The target consumer group is the general

public, including high risk groups such as infants, elderly people and potentially those with food allergies.

Potential Alternate Use(s):
Cocoa powder could be consumed as is and could potentially be used in the cosmetic industry.

Potential for Customer Misuse:
Any activities that could increase the water activity level.
